EXPERIENCE

Independent Contract Work

April 2025 – March 2026

Freelance Full Stack Developer

Remote

- **1TOMILLION** (Dec 2025 – Mar 2026): Took an e-learning SaaS to production with Stripe payments at EUR 107 per enrollment, Vimeo lesson delivery, and an in-browser PDF library; raised mobile PageSpeed Performance from 71 to 91 and Accessibility to a perfect 100 by self-hosting fonts, converting 25+ images to WebP, and eliminating critical-path JavaScript animations. Contained a live cryptominer incident on the VPS through key-only SSH, fail2ban, UFW, and full credential rotation.
- **Sistema Contable PR** (Dec 2025 – Feb 2026): Shipped a multi-tenant accounting SaaS for a Puerto Rico CPA firm from a 10-page written specification, covering 19 local tax obligation types, a three-layer permission model (role plus six capability flags), Stripe subscription billing, an automated deadline agenda, and Excel and PDF export.
- **GREYTHIUM** (Nov – Dec 2025): Built a four-model commerce platform (B2C retail, B2B wholesale, export, import) on a 22-table schema with dual payment gateways (Stripe and PayPal OAuth2 v2 Checkout) and HS-code and Incoterm-aware trade documentation, implemented from scratch in PHP with a hand-built service architecture.
- **CrystalBeryl Media** (Apr 2025): Delivered a complete React and TypeScript multi-page website for a Nairobi-based digital agency in six days from first to last commit, including animated counters, Jarallax parallax sections, Swiper carousels, and a contact page integrated with Google Maps.

Fullstack Labs · Tecnoparque SENA

July 2025 – January 2026

Full Stack Developer

Barranquilla, Colombia

- Built **ECPL** end-to-end, a labor competency certification platform that replaces a fully manual workflow with automated Excel generation and embedded digital signatures over a 15-table schema; live in production with 28 candidates across 4 regional projects and 24 labor competency norms.
- Shipped **VIVU**, a course management platform for SENA covering 80 users, 25 courses, and 334 enrollments, handling institutional agreements with ICBF, INPEC, and the Armed Forces and enforcing a 20 percent enrollment quota for conflict victims through a MySQL stored function called from the service layer.

Proveify

April 2025 – February 2026

Backend Developer

Remote

- Owned the payments path on a B2B NestJS marketplace by integrating Wompi with SHA256 webhook signature verification and building the quotes, favorites, and public-request modules on a repository-pattern architecture.
- Refactored 7 services (Category, File, Item, Plan, Provider, Subcategory, User) onto abstract repository interfaces and introduced an **OptionalJwtAuthGuard** that unified public and authenticated endpoint variants, removing the duplicate controller paths used to serve both.
- Wrote 13 Jest test suites covering every owned module — quotes, favorites, public requests, provider quotes, and payment integration — keeping the codebase regression-safe across a ten-month delivery cycle.

Akademia

December 2024 – June 2025

Full Stack Developer

Remote

- Designed an academic scheduling engine that resolves teacher availability, classroom capacity, weekly hour quotas, and resource requirements as a single multi-constraint problem, and surfaces specific conflict records rather than silently producing an invalid schedule.
- Connected the platform to a legacy Oracle Academusoft system through a dedicated sync service and delivered 58 Livewire reactive components over a 48-table schema covering programs, teachers, course projections, and physical resource inventory.

SKILLS AND INTERESTS

Languages: Spanish (native), English (B2 — Upper Intermediate).

Frontend: React, Next.js, TypeScript, Vite, Three.js, Framer Motion, Tailwind CSS, Livewire.

Backend: NestJS, Laravel, Node.js, PHP, REST APIs, JWT, Swagger, Stripe, PayPal, Wompi.

Databases: PostgreSQL, MySQL, MariaDB, Prisma, Supabase, Eloquent, Row Level Security.

Infrastructure and Testing: Docker, GitHub Actions, Nginx, Ubuntu VPS, PM2, Jest, Playwright.

Interests: Distributed systems, payment platforms, web performance, developer tooling.

EDUCATION

Servicio Nacional de Aprendizaje (SENA) <i>Technical Degree, Software Analysis and Development</i>	2023 – 2025 <i>Barranquilla, Colombia</i>
Servicio Nacional de Aprendizaje (SENA) <i>Technical Diploma, Software Programming</i>	2020 – 2021 <i>Barranquilla, Colombia</i>
