Barranquilla, Colombia — available for remote work

PROFILE

Full Stack Developer with a proven production track record: I've built complete SaaS platforms — database architecture, REST APIs, frontend and infrastructure — as a **sole developer** for clients in **Spain, the United States and Kenya**. I handle the full cycle from schema design to VPS deployment with CI/CD. My projects are live in production with real users and real payments. Main stack: **NestJS · React · TypeScript · PostgreSQL**. Interactive portfolio with live demos at hanner.dev.

EXPERIENCE

Full Stack Developer — Internship

Jul 2025 – Jan 2026

Fullstack Labs · Tecnoparque SENA

- Built **ECPL**, a labor competency certification platform with Excel document generation including digital signature insertion (PhpSpreadsheet) and PDF pipeline — 28+ candidates in production, fully digitalized process.
- Developed **VIVU**, a SENA course management platform with institutional agreement modules (ICBF, INPEC, Armed Forces), a 20% enrollment cap for conflict victims (MySQL stored function) and executive dashboard — live in production.

Backend Developer — Remote

Apr 2025 – Feb 2026

Proveify

- Implemented **Wompi** payment gateway with SHA256 webhook verification, quotes, favorites and PublicRequest modules in a B2B NestJS marketplace following repository pattern architecture with abstract interfaces.
- Refactored 7 services to the repository pattern and built **OptionalJwtAuthGuard** — eliminating duplicate API endpoints. Full Jest coverage across all owned modules (13 unit test suites).

Full Stack Developer — Remote

Dec 2024 – Jun 2025

Akademia

- Built an automated academic schedule generation engine with a multi-constraint algorithm (teacher availability, classroom capacity, hour quotas) and bidirectional integration with a legacy Oracle system.
- Developed 58 Livewire components for program, teacher, resource and course projection management on a 48-table schema.

FEATURED PROJECTS — interactive demos at hanner.dev

Sistema Contable PR
↗ demo

Multi-tenant SaaS for CPA firms in Puerto Rico. 19 tax obligation types, Stripe subscriptions, granular per-flag permissions, Excel/PDF export. Built from a 10-page client spec as sole developer.

Next.js 15 · NestJS · PostgreSQL · Stripe · Docker · Playwright

1TOMILLION
↗ production

E-learning SaaS in production with real Stripe payments (107 EUR), Vimeo video with autoplay, PDF library and CI/CD to own VPS. Includes handling of a real security incident in production.

React · NestJS · Supabase · Stripe · GitHub Actions · Nginx

WeDoItBranding
↗ demo

AI branding SaaS for an international client (Fiverr). Custom WebGL Three.js hero with no wrappers, 13-step immersive questionnaire and live Google Cloud Run integration.

React · Three.js · TypeScript · Framer Motion · Vite

GREYTHIUM
↗ production

B2B/B2C international trade platform. Dual payment gateway (Stripe + PayPal OAuth2), import/export modules with HS codes and incoterms, 22-table schema. Built without a framework.

PHP · MariaDB · Stripe · PayPal API · Apache

SKILLS

FRONTEND

React · Next.js · TypeScript · Vite · Three.js · Framer Motion · Tailwind CSS · Livewire

BACKEND

NestJS · Laravel · Node.js · PHP · REST API · JWT · Swagger · Stripe / Wompi

DATABASE

PostgreSQL · MySQL · Prisma · Supabase · Eloquent · RLS

INFRASTRUCTURE & TESTING

Docker · GitHub Actions · Nginx · VPS Ubuntu · PM2 · Jest · Playwright

EDUCATION

Software Analysis & Development — 2023 – 2025
Servicio Nacional de Aprendizaje, SENA

Software Programming — Technical High School — 2020 – 2021
Servicio Nacional de Aprendizaje, SENA · Certifications: Power BI · Office Suite (2024)
